

TANK CIVIL

TANK CARDEFENSE

They steal without breaking a window. Your car never locks.

A signal jammer cuts off the car's locks and its GPS at the same time, without forcing anything. CarDefense makes the attack visible and guides your team to whoever is carrying it out.

8×8 m

precision with Hyperlocation

Even in the worst case: an enclosed parking garage, where the signal bounces and gets absorbed.

< 5 m

certainty with the handheld detector

The radar-style handheld detector closes the last meters of the search.

53 ha

coverage with one sensor

Up to 53 hectares with one sensor (about 131 acres), a radius of 410 m.

01

You will see the attack.

What is silence today becomes an alert with a place and a time.

02

Your team will get there.

The alert takes the right guard to the right place, and the search is closed on the ground.

03

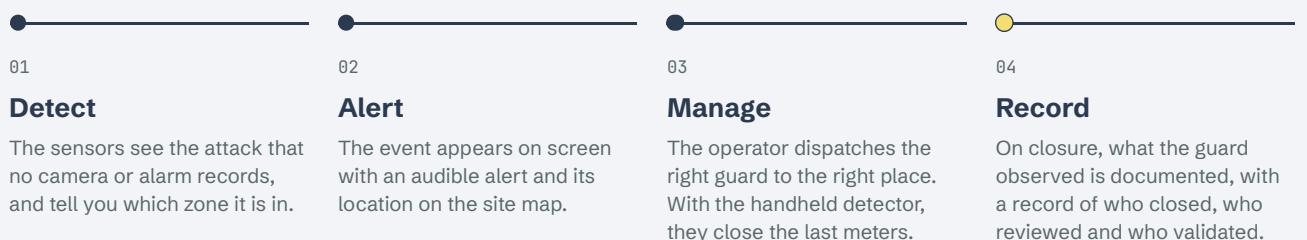

There will be a record.

Every event records who dispatched, who closed and who validated.

WHERE

Malls and strip centers • Casinos • Gas stations • Parking lots

RESPONSE CHAIN

Until your team reaches the attacker, search included, at any site size. With the system running and a trained team; it varies with the scenario.

PUBLIC SPECIFICATIONS

PARAMETER	VALUE	CONDITION
Detection and location		
Coverage per fixed sensor	Up to 53 ha	Equivalent to a radius of 410 m
Certainty with Hyperlocation	8×8 m	Even in the worst case, an enclosed parking garage
Certainty with the handheld detector	< 5 m	Radar-style fine search, at the venue or on patrol
Configurations	One · Sector · Hyperlocation	Same sensors, different level of certainty
Response		
Time to target	~1 min	Regardless of venue size. Includes the guard's search; depends on training and the scenario
Alert management	Tank Mission Control	Dispatch, closure, review and validation with traceability
Integrations	Venue CAD and cameras	—
Service		
Operation	24/7	Continuous monitoring of the equipment by Tank
Calibration	By Tank	Tuned to your venue at installation and whenever your operation changes
Training	Tank Academy	Certified guards and CCTV operators, with public verification

WHAT'S INCLUDED

- Fixed sensors with 24/7 coverage
- CarDefense Mobile handheld detectors
- Alert tablet and Tank Mission Control
- Tank Academy: certified guards and operators
- Calibration, monitoring and maintenance by Tank
- Integration with your CAD and your cameras

LEGAL FRAMEWORK

Since December 2024, Chile's Law 21.720 makes it a crime to sell, carry or use a signal jammer. Carrying one is already a crime; there is no need to wait for the theft.
